PROFESSIONAL SUMMARY

Full-stack Developer with 2+ years of hands-on experience building business systems on both **High-code (Go-Fiber, Next.js)** and **Low-code (Joget DX)** platforms. Currently developing **Sukreep**, a multi-tenant SaaS ERP & POS, and previously built e-Procurement and Fixed Asset Management systems for GISTDA. Experienced in workflow automation, real-time inventory and multi-branch data, and in keeping releases stable with **automated end-to-end tests (Playwright)**.

WORK EXPERIENCE

Jr. Web Developer (Full-time)
Jan 2026 – Present

SIAM INNOVATOR CO., LTD.

Project: Sukreep (SaaS ERP & POS)

- Developed **Sukreep**, a full-featured SaaS ERP & POS system using Go-Fiber and Next.js, designed for multi-tenancy retail and restaurant businesses.
- Implemented complex procurement workflows and real-time inventory management systems for multi-branch scalability.
- Built a Hybrid POS system featuring seamless QR Menu integration for interactive customer ordering.
- Developed accounting modules supporting comprehensive tax calculations (VAT, WHT) and accurate income-expense analytics.
- Designed the system for high performance and enterprise-level scalability, focusing on efficient data processing and system stability.
- **Test Automation:** Automated Sukreep's regression tests with Playwright and AI-assisted testing (TestSprite), replacing repetitive manual testing.
- **IT Support:** Handle in-office IT support: coordinating with the internet service provider, maintaining printers, and advising users on the company's software.

Joget / Low-code Developer (Full-time)
Dec 2024 – May 2025

Cyberkings Consulting Co., Ltd.

Project: GISTDA (e-Procurement & Fixed Asset)

- Developed an end-to-end system covering the entire lifecycle: Procurement → Inspection → Fixed Asset Registration → Borrowing/Returning → Movement.
- **Workflow Design:** Designed complex flows using Joget Process Builder, implementing multi-level approval hierarchies based on organizational structure.
- **Form & Report:** Created comprehensive forms for purchase requests, inspection reports, asset registries, and generated dynamic reports.
- **Permission Management:** Configured Role-Based Access Control (RBAC) to align with GISTDA's internal structure for secure data access.
- **Custom Logic:** Utilized BeanShell/Java to implement complex data validation, budget verification, and automated email notifications.

Joget / Low-code Developer (Internship)
Jul 2024 – Dec 2024

Cyberkings Consulting Co., Ltd.

- Gained practical experience in using Joget DX Platform to develop Forms, Workflows, and Userviews.
- Assisted the development team in building modules for procurement and asset management systems.
- Performed bug fixing, UI adjustments, and system testing to ensure software quality.

Frontend Developer (Internship)
Apr 2024 – May 2024

Bright Expert Company Limited

- Assisted in developing modules for Payroll and Social Security management (Flow HR).
- Resolved bugs and enhanced the Employee Dashboard using React and Ant Design.

TECHNICAL SKILLS

Frontend Development
React, Next.js, HTML5, CSS3 (Tailwind)
